### **DETAILED ACTION**

Due to the complex nature of the claims, no request for an oral election is being made. Please see MPEP 812.01.

#### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 27 and 29-39 are drawn to a method for glycaemic control in a mammal, such as a human, which method comprises administering an effective amount of glutaminy l thiazolidine or glutaminy l pyrrolidine, or a pharmaceutically acceptable salt thereof, and another antidiabetic agent to a mammal in need thereof, classified in class 514, subclasses 365 and 635.
- II. Claims 28-39 are drawn to a method for the treatment of diabetes mellitus and conditions associated with diabetes mellitus, the prediabetic state and/or obesity in a mammal, which method comprises administering an effective amount of glutaminy l thiazolidine or glutaminy l pyrrolidine, or a pharmaceutically acceptable salt thereof, and another antidiabetic agent to a mammal in need thereof, classified in class 514, subclasses 365, 635 and 866.

The two inventions are independent and distinct, each from the other as they have a separate status in the art as shown by their different and separate subject

matter for inventive effort. Further, a reference, which anticipates any one of the above inventions, would neither anticipate nor make obvious of the other inventions. Each such invention is capable of supporting its own patent. For these reasons, the restriction requirement is proper.

To be complete, applicants' response must include a provisional election even though the requirement may be traverse.

The applicants are required to elect a single invention for examination purposes.
